Work Experience

Vibecode (Not A Number Labs)

Feb 2026 – Sep 2026

Software Engineer

Remote (US)

- **131 merged PRs, 404 commits** across 7 TypeScript/Go repos (app, Go proxy, agent sandbox, runner).
- Owned **LLM model rollouts end to end** – Opus 5, Fable 5.1, GPT-6 Astra, GLM 5.3, Grok 4.6 – across the model picker, the **Go routing + per-token pricing proxy** and the agent sandbox image, each with a production cherry-pick.
- Built billing flows: **card-required deployment trials** that auto-convert on expiry, a **7-day downgrade grace period** with 4 staged reminders, redesigned auto-reload tiers, and serialized subscription creation to stop duplicates.
- Led the **Amplitude → Mixpanel migration** (~12k lines): event contract, first-party proxy, web + iOS funnels.
- Root-caused prod incidents: a rate limiter giving **every customer one shared bucket, 100% VM-creation failure** on one cloud, and a **destructive schema push on boot**.
- Migrated the mobile app and templates to **Expo SDK 54 / React Native 0.81** (~9k lines) and built **nested subagent tool-call streaming** into the agent UI.

Fleek.xyz

Aug 2025 – Dec 2025

Frontend Engineer (US Remote)

Contract

- Worked across **6 repos**; built the **React + Tauri** desktop app from scratch (Vite + TypeScript, **TanStack Query**, memoization), holding **60fps** in data-heavy views, on a shared **Tailwind** design system.
- Shipped social features (public browsing, @mention autocomplete, an **AI-prompt profanity filter**); moved media to **Cloudflare R2** and added **Statsig** remote config; built a **FLUX** image-generation bot on **Fly.io**.

Gomini

Mar 2025 – Feb 2026

Founding Engineer

Remote

- Built the **Flutter** app and **Supabase** backend **0 → 1 as sole engineer**, with CI/CD, before incorporation; it became the digital sales channel.
- Engineered payments: **Razorpay** and **Flexi-Pay subscriptions** with server-initiated payments, EMI/one-time plans, live price recalculation and a fail-safe for incomplete payments.
- Shipped KYC upload with live status via edge functions, referral **deep links** with an ambassador dashboard, **FCM** push with silent live updates, and gesture-driven UI with shared-element transitions.

Subcart

Mar 2025 – Jun 2025

Software Engineer

Remote

- Built a subscription platform (Flutter, Node.js, MongoDB): 10+ REST APIs, ~200ms faster key queries.

Iotree Minds

Dec 2024 – Mar 2025

Mobile Engineer

Remote

- Shipped 3 launch features for a client's Flutter matchmaking app (**500+ downloads** in month one); 12 APIs.

IIT Madras (5G Testbed)

Jun – Jul 2023, Feb – Jun 2024

Research Intern

Chennai, TN

- Built a **1 Gbps** Python speed-test server (<5% variance) and a Flutter + Express app with sub-second live readings.

Projects

Flag Me (GenAI Gift Engine) | Flutter, FastAPI, Gemini
